

## Accelerate adoption, redefine collaboration and maximize governance

Leverage Microsoft Teams capabilities for more than just chats and meetings - give your users access to the tools, apps, documents and information they need, within context of project and team they are working on.

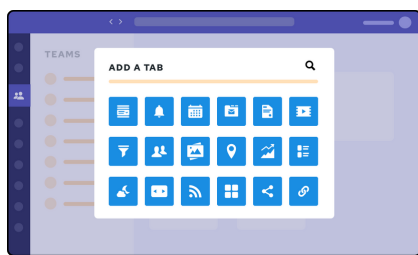

### Build immersive collaboration scenarios

An intelligent, personal, integrated and industry-specific workspace where employees spend the bulk of their day. Highly functional and business-oriented, this flexible collaboration space can be deployed without any coding.

For an easy start, industry-specific starter kits are available, totally configurable per business needs, using 19 base available apps.

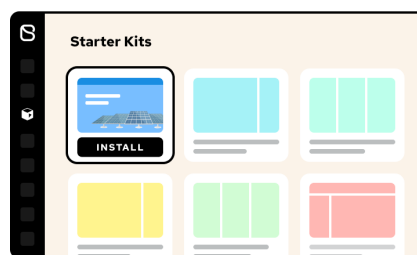

### Why?

- ✓ Encourage teamwork
- ✓ Empower power-users from Marketing and HR with content mgmt responsibilities, with editing and curating capabilities.
- ✓ Ensure minimal governance and control by pre-defining best-practice scenarios, deployable within minutes

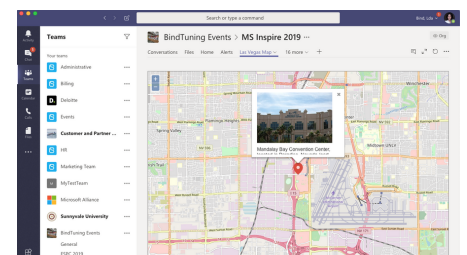

### Powerful tools at your fingertips

- ✓ 19 apps, endless configurations
- ✓ 24/7 updated information from external sources: RSS feeds, Weather, Stocks, Maps
- ✓ Curated content, created by power-users. No code required.

### Easy to deploy for optimal governance and scalability

- ✓ Configurable starter kits, pre-packed with channels, tabs, apps and permissions, that address your company's top business needs
- ✓ Unlimited deployments at scale

### Even smarter Teams, based on the power of AI and Graph

- ✓ Leverage the power of AI, with smart tools like keyword search on images, within the Image Gallery app
- ✓ Personalized access to my email, calendar and documents, within the My Work app
